Improving Your Business

Van der Ende Group is an innovator, manufacturer and supplier of technical products in the fields of water, air, climate and filtration. We produce and supply a wide range of pumps and accessories, water treatment systems, electric motors, frequency controllers, valves for controlling flow, horticultural fans and filter systems. We provide specialist advice and fast, extensive technical services to our customers in various markets. Our numerous innovative and often patented products are sold worldwide.

Service is of top importance to us and we distinguish ourselves by flexibility and outstanding technical services. Van der Ende Group is also a reliable partner for complex projects.
